

## The Perfect Storm

- Students stand in a circle.
- Instruct them to copy the person on their right.
- Start rubbing your hands together and encourage the student on your left to copy you.
- When the rubbing has reached you again, change your action to rapid finger clicking with both of your hands.
- When clicking is back to you, change to rapid pattern on your thighs with both hands.
- Finally, when patting reaches you, change to stepping rapidly on the spot.
- When the stepping reaches you, reverse the actions – patting thighs, clicking fingers and rubbing.

**N.B This activity can be done standing with a group and the leader simply starting the actions and the group copying simultaneously, until the leader changes to the next action.**
